

## OSAKA YMCA 'Early Intervention Program'

In May, June & July of 2015 & 2016

We conducted & concluded our summer 'TERACTIVITIES' at the OSAKA YMCA in Tosabori (2015) & Tennoji (2016), & the program was successful. The children enjoyed it a lot and it was well received by the parents.

Below are some comments from parents who attended this program with their child.

It was good that the children's feeling's, emotions & intentions were kept in mind and accepted, and they were taught to follow rules e.g. waiting patiently in turns.

There were good examples of various therapies in the program that we could continue doing very easily at home to further help our child.

It was good for my child to get used to enjoy listening to English and accepting and following instructions in a natural way.

It was good to have children do exercises in line with their abilities
