

## One Day Special Education Group Workshop [1DGWS]

This 1 Day Special Education Intensive Workshop can be arranged at your school or establishment for your teachers or staff, on any mutually agreed day or date on request (conditions apply). This Workshop is good for the professional development of teachers & staff who deal with, take care of or work with special needs children.

The subject of this Workshop is.....

### Strategies & Activities for Positive & Successful Learning & Behavior Outcomes in Inclusive Classrooms & at Home

#### Who should attend?

- Regular school teachers of preschool, nurseries & kindergartens elementary to high school, special needs teachers & educators, school head masters & principals.
- OT's, speech & language therapists, psychologists, child caregivers, neurodevelopment therapists, doctors, physiotherapists, etc.
- Parents and caretakers of special needs children
- Any person who wants to make a difference in helping special needs children reach their potential.

#### Workshop Objectives?

This work shop is designed to help participants learn how to teach, educate & provide basic therapy & education & address the various difficulties and problems that special needs children face. through various strategies & activities including movement, exercise, play, games, music, songs, etc. This can be done on a one-to-one basis for one child or in a group setting, by teachers in a classroom or gym, parents in the living room of their own home & caregivers in their workplace.

#### Who is conducting this Workshop?

- Mr. Cecil Burton has worked in management & consulting positions in various fields, in the Gulf countries over 15 years. These include working in industries such as hotel & catering, airline, travel & tourism, education, import/export & trading & real estate.
- For 20+ years he has lived in Japan & has been working in the fields of teaching, education, special education & consulting.
- Over the last 15 years in Japan he has focused on working to provide bilingual education,

therapy and support for special needs children, their families and teachers.

- In 2010 he started the Cee Bee Center (Communication, Exercise, Emotions, Behavior & Effective Education) a support, training, education & therapy center for special needs children, parents & teachers. Ever since has been helping both Japanese & foreign special needs children, their families and teachers through consulting, counselling, education, therapy and training programs.

## What is this Workshop about?

This workshop will cover various topics that include the following....

1. Development & behavioral issues that are associated with Autism, PDD-NOS, Asperger's syndrome, physical & learning difficulties.
2. The Senses & various Reflexes & how partially retained Primitive & under developed Postural Reflexes can affect learning & motor coordination. Considerations, providing strategies & various therapies for educating & supporting special needs children as mentioned in point 1.
3. How Early Intervention especially between the ages of 1 to 6 years would help babies, toddlers & young children with developmental delays, disabilities, physical, social, communication & behavioral problems would really help put a child on the road to achieve a better & brighter future, a better quality of life & more independent living.
4. How to cope with & address various types of problematic behavior in children
5. How you could use a general screening tool for special needs children.
6. The 'Move to Learn' Program. How it will help support & promote primitive reflex integration & the development of postural reflexes in toddlers & young children. By doing it just 15 to 20 minutes a day with your child at home or in school it will improve the brain & body's balance, communication and coordination which makes for better learning.
7. The Cee Bee Center in Japan & the development of its 'ACE' Program (Activity, Communication and Exercise Program).
8. Various physical movements, activities, exercises, games and songs that will help raise a child's level of.....
  - o body awareness→
  - o brain & body coordination→
  - o body center line balance→
  - o concentration→
  - o self-confidence→
  - o spatial awareness & spatial skills→
